

# LOADSTAR

for Commodore® 64 and 128

BACK ISSUE  
Catalog

# A Word about *Loadstar* ...

Jim Mangham established **Softdisk** in September 1981 by mailing the first issue of **Softdisk™** to fifty Apple® owners. The first seventeen issues of **Softdisk** were single-disk issues, but since #18, all issues have been published on two disks. Today **Softdisk** is sent to thousands of eager Apple users each month.

In May 1984, **Loadstar™** was launched for Commodore® users. Because of the publication's evident commitment to this important group of computer owners, **Commodore Magazine** adopted **Loadstar** as its disk companion. Issues #9-#61 and #63 in this catalog contain programs which are the result of this cooperative agreement.

Back issues of **Loadstar** allow you the opportunity to select only those issues which contain specific programs you would like to own — whether games or utilities, or tutorials or applications. The choice is *yours!*

Back issue catalogs are also available for our other monthly collections: **Softdisk** for the Apple II family, **Big Blue Disk™** for the IBM®-PC and compatibles, and **DiskWorld™** for the Macintosh.

If you would like one of these other back issue catalogs, you may request one when you call to place your order for **Loadstar** back issues.

**Softdisk Publishing**  
**P. O. Box 30008**  
**Shreveport, LA 71130-0008**

## ISSUE #1 (One Disk)

**Lunar Lander** — Have you got the "right stuff" to be an astronaut?  
**Hopper** — Bet you can't leave just one (peg, that is...!)  
**Cows & Bulls** — It helps to be a "Mastermind" in this *non*-agricultural program.  
**Color LISTER** — Make screen LISTings easier to read by color-coding BASIC 2.0 and 4.0 keywords.  
**Disk Scanner** — Check an entire disk for bad and marginal sectors.  
**Sector Corrector** — Help fix certain errors on a disk.  
**File Scanner** — Check an individual file for bad and marginal sectors.  
**French Military Game** — Your 64 gets smarter as you play this strategy "board" game.  
**Slot Machine** — Everyone hates bandits — even if they have only one arm!  
**BAM Map 64** — Answer Shakespeare's question: What is used and what is not?  
**Binary SAVE** — Emulate the IBM and Apple BSAVE command for saving "raw" memory.  
**Decision Maker** — A program to help you — but not take responsibility for your actions!  
**"Blip" is the "Bleep" of "Blap"** — A random aphorism generator.  
**How Smart Are You?** — A program which will *not* answer the question!

## ISSUE #2 (One Disk)

**Planet of the Robots** — You're thrust into a future ruled by robots in this text adventure game.  
**Detective Cody** — A Commodore-64 version of "Clue."  
**Psymon** — Like "Simon," can you repeat what you see and hear?  
**Light Racers** — How long can you avoid a crash in this 2-player joystick game?  
**Chemistry Drill** — A review of the chemical elements, symbols, and formulae.  
**Multiple Choice Tester** — A true teacher's aid(e) which makes and takes tests.  
**Ocean of Life** — Some people pay a shrink good money for an analysis like this!  
**Address Keeper** — Keep track of names, addresses and phone numbers in a SEQuential file.  
**Loan Planner** — Even if you don't know what "amortization" is, you'll find this program helpful.  
**Crypto-Gram Helper** — Solve cryptogram puzzles, or create and save your own.  
**Middle Earth Quiz** — Tolkienophiles will *love* this one!

## ISSUE #3 (One Disk)

**Smurk** — An evil cave-dwelling creature guards an immense treasure in this text adventure game.  
**Head-On** — Prove you're the good driver you think you are with this arcade game.  
**Guess What?** — This game gets smarter every time it is run!  
**Poker Parlor** — Anyone for a game of five-card draw?  
**Tables & People** — One definition of intelligence is the ability to recognize patterns.  
**Stress Test** — Let Drs. Holmes and Masudu compute your social readjustment factor.  
**Checkbook Balancer** — Keep your checkbook and your bank statement reconciled.  
**Rate Exchange** — Print a currency-conversion chart for your trip abroad.  
**4-Minute Copy** — Format and copy an entire disk in 4 minutes on a single drive!  
**Base Converter** — Convert *from* and *to* any base up to 36.  
**A Gardening Tool** — Polish up your programs and stamp out boring INPUT statements.

## ISSUE #4 (One Disk)

**Spectrum** — A challenging solitaire card game with colorful graphics and sound.  
**Spiders** — Catch spiders, avoid killer bugs — and *Raid!* — in this entertaining arcade game.  
**Madman** — Meet a few new faces in this new twist on **Breakout**.  
**Fireflies** — Capture as many as you can without getting "stung" by the Mutant firefly!  
**Western Writer** — A random Western movie plot summary writer.  
**Teacher's Gradebook** — Store your records, and sort by average or alphabetically by name.  
**Planet Program** — A real treat and a lesson in sprite animation.  
**Memo Pad** — Add, change, or delete any memo you have on file.  
**Reel Facts** — So you think you are a movie fan? How well do you know the Academy Awards?

## ISSUE #5 (One Disk)

**Nominee '84** — A challenging simulation. Do you know enough to become President?  
**Sound Designer** — Design any sound, then POKE it into your BASIC programs.

## ISSUE #5 (Continued)

- Left/Right Game** — You know your left hand from your right, right? Don't be so sure!
- Biorhythm** — Find out how you will be feeling next week with this program's printout.
- Electronic Palm Reader** — Save a trip to your nearest fortune teller by playing this game.
- Sci-Fi Writer** — A random science-fiction movie plot summary writer.
- Addition Drill** — Help youngsters practice basic adding skills.
- State Guessing Game** — A challenging name-the-state-capitals game.
- Babysitter's Notes** — Names, addresses, and special notes for your babysitter.
- Nutrition Information** — Check out this essay on health from a registered dietician.
- Diet Program** — Stay on your diet with the help of this program.

## ISSUE #6 (One Disk)

- Election Night** — Now you can out-predict TV election-night projections!
- Baseball Adventure** — See if you can keep your job as a ticket salesman.
- Othello** — You'll absolutely "flip" over this version of an old favorite!
- Bingo** — Have your C-64 print the cards and even call out the numbers for your Bingo Party!
- Typing Tutor** — Practice almost any set of keys and see your typing skills improve.
- Heat Stress** — Similar to **Wind Chill**, this program takes into account temperature and humidity.
- Horror Writer** — A random horror movie plot summary generator.
- Snoopy Calendar** — Print a 12-month calendar with a picture of everyone's favorite beagle.
- Weights & Measures** — One handy program replaces hundreds of conversion charts!
- Visible Bubble Sort** — For those who have always wondered just how a bubble sort works.
- Draw** — Turn your C-64 into a hi-res doodling screen.
- Jump** — Lost creature that you are, can you escape from the depths of this underground maze?
- SYS Finder** — This handy utility helps you remember that long-forgotten SYS.
- Delta Date** — Now you can find out just how many days there are until Christmas.

## ISSUE #7 (One Disk)

- Super Keno** — Pick your card and see how good you are at guessing numbers.
- Connect 4** — Play against your C-64 or a friend in this fantastic game of concentration and logic.
- Multiplication Drill** — More math practice for the middle to upper elementary grade student.
- Library Adventure** — Explore the planet of Librarianium.
- Sound Phrases** — Now you can find out what "oom-pah-pah" really sounds like.
- Loan Calculator** — Calculate monthly payments for up to eight different situations.
- Outstanding Grapher** — Add graphic representations to any type of presentation!
- World Air** — Calculate the distance in air miles between almost any two cities in the world.
- Wind Chill** — How cold it *feels*, not how cold it is!
- Para-Tester** — Outguess the C-64's random-number generator—you may have ESP!
- Header Changer** — Change the header of any formatted disk.
- SYS Changer** — Change the load address of a file.
- IMML** — Have your program play music while it is executing.

## ISSUE #8 (One Disk)

- Remember If** — Find the graphic match behind one of 45 doors in this "Husker Do"-inspired game.
- Slot Machine** — A simulation of one-armed bandits.
- Chemistry** — Search the Periodic Table by name, symbol, or atomic number.
- Lazy Math** — There's no need to memorize formulas ever again!
- Roman Numbers** — Convert from decimal to Roman and vice versa.
- Address Labeler** — Design custom labels containing up to four lines of text.
- Flash** — Display and flash up to 128 characters on your screen!
- Sleeve Lists** — Print sleeve-sized catalog listings of diskette contents.
- Bar Chart** — Print a bar graph with your 1520 color printer/plotter.
- Runner** — Compute the jogging pace required for a given finishing time.
- Screen Wobble** — An example of what you can do with an ML IRQ (Interrupt ReQuest) routine.

## ISSUE #9 (One Disk)

- Poe Adventure** — Based on the life of Edgar Allen Poe.
- Columnation** — An example of how to format numeric output.
- Hail** — Try to keep your head dry in this slick *three-line* program!
- Color Interrupter** — Now you can halt a program and change any of the screen colors.
- Directory Alphabetizer** — Locate specific files in long directories more easily.
- Guitar Chord Finder** — Enter a few facts to find the fingering of any chord.
- Sprite Catalog** — Create, edit, load and save as many sprites as you want.
- Birthday Card** — Create a more than memorable card for your loved one.
- Alarm Clock** — Features large numbers for easy viewing and variable clock color.
- In Between** — Try to guess the next card before bidding or playing.
- Poker** — The traditional game for your computer and up to four players.
- Resistor Color** — Supply the colors of the bands and find out the resistance of any resistor.
- Color Print Test** — Find out what action to take to produce the best color prints possible.

## ISSUE #10 (One Disk)

- Disk to Tape** — Back up your floppy disks to your datasette cassette tapes.
- Tape to Disk** — Restore files backed up with **Disk to Tape**.
- Trial and Error** — Approximate answers to high-powered polynomials.
- Beats** — Produce musical notes with audible pulsations.
- Scales** — Switch between equally-tempered and diatonic scales.
- Tinker Tools** — A Simon's BASIC program for producing graphic designs.
- Gadget** — A utility program to append and renumber BASIC programs.
- Lair of the Necromancer** — Defeat the evil Necromancer in this text adventure.
- Box Puzzles** — You won't solve these quirky puzzles unless you look at things with a twist.
- Life Expectancy** — How long will you live? Change a few habits and see what the results would be.
- I.Q. Test** — A "simple" test that measures how much common sense you have.
- Introductions** — Another great musical piece from Tom Jeffries.

## ISSUE #11 (One Disk)

- E.R.** — Do you have what it takes to become an emergency room doctor?
- Flash** — Improve the speed and accuracy of your typing.
- Wordsmith** — Pit the computer's vocabulary against your own.
- Recipe Filer** — A great way to keep track of all your favorite recipes.
- Trace** — A must-have utility for any programmer.
- Impossible** — Create programs which look really funny!
- Program Boot** — Make your programs RUN by themselves.
- Renumber** — Renumber just about any BASIC program.
- Bit Banner** — Produce huge banners to use at parties.
- Color Scheme** — Keep the colors you like even after RUN-STOP-RESTORE!
- Disk Enlarger** — Store more information on your disks.
- Graph Sim 64** — An example of how much fun serious computing can be.
- Lunar Lander** — A real-time landing simulation.
- Easter** — Can you find five hidden Easter eggs?
- Concentration** — An entertaining solitaire card game.
- Mastermind** — A LOGO version of an old favorite.
- Buzz Words** — Use LOGO to create endless phrases.

## ISSUE #12 (One Disk)

- Hopper** — See how long you can escape the missiles in this arcade game.
- House Inventory** — Now you can keep track of exactly what you have in your home.
- DOSplus** — Some great new additions to the old favorite **DOS Wedge**.
- Dragon's Riddles** — Answer the dragon's riddles to gain his magical music box.
- July 4th** — A good example of how to use color and sound in your programs.
- Dallas** — Show off your C-64's sprite capabilities.
- Three Deep** — A small routine which will vastly speed up your sorts.
- Life** — Turn your C-64 into a laboratory filled with bacteria!

## ISSUE #12 (Continued)

- Gauss** — Solve multiple equations.  
**Net Worth** — Produce a very professional-looking net worth statement.  
**DisDump** — Disassemble your C-64's memory and find out how those neat ML routines work.  
**Aras.Calc** — Save money by calculating flexible amortization schedules.  
**Budget-Master** — Keep track of where your money goes every month.  
**COMAL Corner, Parts 2-5** — An interactive tutorial series on COMAL 0.14.  
**Math Reflections** — Topics include Number Theory, Euclidean Algorithm, and Greatest Common Divisor.

## ISSUE #13 (One Disk)

- RAM Disk** — Save up to 32 programs at once in your C-64's memory!  
**Lunar** — How long can you avoid the missiles in this arcade game?  
**Think Again** — Logicians will love this game, a great twist on **Mastermind**.  
**Camel Trek** — How long can you avoid the pygmies in this adventure game with a twist?  
**Directory Editor** — Customize all your Commodore disk directories.  
**EXDir** — An easy way to call up a directory — without having the DOS wedge installed.  
**Flip 64** — A type of **Othello** that allows you to select the size of your board.  
**Dice Master** — A must-have program for all role-playing gamers.  
**Get-Print** — A quick and effective screen dump.  
**Language Translator** — Quiz yourself on your favorite foreign language.  
**OPEN 4** — Print a one-page decimal-to-hex conversion chart.  
**Disk Format** — A user-friendly way to format your new disks.  
**Peabody** — A menu-driven filing system.  
**Label Maker** — Select a format, then design and print your own custom labels.  
**PEEK-a-POKE** — Watch a program program itself, or observe some exotic POKES.  
**Marquee** — Design and scroll large banners horizontally across your screen.  
**Line Writer V64** — A simple text-line processor which allows the printing of your text.  
**LOGO Routines** — A collection of powerful routines dealing with list processing in LOGO.  
**Necromancer II** — Try to stop the villain's terrible reign of terror.  
**DOS & Don'ts, Parts 29-39** — You will find the unscratch-file program especially helpful.  
**PEEKs, POKEs, and SYSeS, Parts 30-31** — An inside look at **Loadstar**'s operating system.  
**COMAL Corner, Part 6** — Another interactive tutorial on COMAL 0.14 (not required).  
**Math Reflections** — Features include Taylor's Theorem, Polynomial Division, and Partial Fractions.

## ISSUE #14 (One Disk)

- Wormshot** — Defend your city against the onslaught of killer worms from the sky.  
**Orbit** — How long can you survive against the attacking aliens?  
**Verbosity** — How many words can you find in the time allotted in this Boggle-like game?  
**Algebra** — A wonderful way to practice solving algebraic equations.  
**Sort Collection** — Three of the more popular sorts, plus an ML version of the Shell-Metzner sort.  
**Sprite Editor** — Receive on-screen help as you design your own sprites.  
**Write Guard** — An easy way to write-protect your disks without using sticky tabs.  
**Memory Finder** — Search through memory for line numbers.  
**XDOS** — Customize DOS to fit your own needs.  
**Alarm Control** — With a little extra hardware, your C-64 controls a burglar alarm in your house.  
**Textrapolation** — Three programs try to predict from your prior input what will be typed next.  
**Dos & Don'ts, Part 40** — More information about the 1541 DOS.  
**PEEKs, POKEs, and SYSeS, Parts 32-36** — A beginning look into hi-res graphics routines.  
**COMAL Corner, Part 7** — Another interactive tutorial on COMAL 0.14 (not required).  
**Math Reflections** — Learn about Diophantine Equations and a Useful Lemma.

## ISSUE #15 (One Disk)

- Steinman Spreadsheet** — A scaled-down version of the newest addition to our software series.  
**Chicken Maze** — How many points can you rack-up while dodging the fowl enemy?  
**BacterioLab** — Design magnificent bacterial colonies in this version of **Life**.  
**Amazing Grace** — Create your own huge mazes and amaze your friends.

## ISSUE #15 (Continued)

- Little Black Disk** — Keep track of your most-used names, addresses, and phone numbers.  
**Budgeter** — A quick and painless way to keep your assets in line with your liabilities.  
**Secret Code** — A subroutine for protecting your programs from unauthorized access.  
**Simple LIST** — Modify your program listings to make them more readable.  
**Address File** — Add a few modifications to the random file program that came with your 1541.  
**Force I** — Battle through enemy territory as you make your way to the enemy's depot.  
**BAUDleship** — Play the old game of "Battleship" via modem!  
**List Processing in LOGO** — The continuation of our LOGO series.  
**PEEKs, POKEs, and SYSeS, Part 37** — A continuing look into hi-res graphics routines.  
**COMAL Corner, Part 8** — Another interactive tutorial on COMAL 0.14 (not required).  
**Math Reflections** — Subject include simple and compound interest and annuities.

## ISSUE #16 (One Disk)

- Easy Copy** — An easy way to copy files — even RELative files! — from one disk to another.  
**C-64 Rescue** — Save your fellow astronauts from a long trip in space.  
**Miner** — Watch out for unexpected dangers as you mine your land for gold.  
**Cribbage Solitaire** — Enjoy a game of solitaire when you're the only one home.  
**ML Merge** — Merge routines from one program into another to form a third program.  
**Radio** — Keep track of your favorite AM stations with this creative approach to specific databases.  
**C-128 Sound** — A few small programs to get you started on the new 128.  
**Simple Windowing** — Create and use impressive windows on your C-64.  
**File Translator** — Translate a program in the form of a SEquential file into a program in memory.  
**Figure Maker** — Design and mathematically manipulate hi-res drawings or graphs.  
**SID Plays Bach** — Two versions of a classic Bach tune.  
**Random Crystals** — Study the growth of crystals.  
**PEEKs, POKEs, and SYSeS, Part 38** — A continuing look into hi-res graphics routines.  
**COMAL Corner, Part 9** — The most up-to-date news on COMAL from Playnet.  
**Report from MARCA Fair** — Joel Rea visits the Commodore computer fair.  
**Math Reflections** — Topics include Chi-Square, Fisher's Exact Test, and McNemar's Test.

## ISSUE #17 (One Disk)

- Forest Fire** — You are the ranger in charge, and an arsonist is terrorizing your forest!  
**Quikrunch** — Make your programs as small as possible for optimum speed and space savings.  
**Mr. Mailman** — Keep track of names, address, phone numbers, and comments with ease.  
**ABC.Sort** — You may want to include this fast sort routine in your own programs.  
**Snap Shot** — A quick and easy way to save your text screen in memory for later viewing.  
**Better Function Keys** — Modify and edit the function keys on the newer Commodore computers.  
**128 Circles** — Create beautiful patterns with nothing more than ordinary circles!  
**Scary Halloween** — Set up your computer this Halloween for a scary good time.  
**Dogfight** — How many kills can you get with a limited amount of ammunition and time?  
**Jungle Heat** — Race your way through the heat and dangers of the jungle.  
**Multi-Color Bar Braphs** — Create bar graphs to view and compare different sets of data.  
**Matcher** — How good are you at matching wits with a computer that knows how to "learn"?  
**COMAL Corner, Part 10** — Another interactive tutorial on COMAL 0.14 (not required).  
**PEEKs, POKEs, and SYSeS, Part 39** — A continuing look into hi-res graphics routines.  
**Game Designing, Parts 1-2** — A series of articles about the construction of your own games.  
**Steinman Template** — A true application of the Steinman spreadsheet.

## ISSUE #18 (One Disk)

- Q&D CAT Tool** — Rearrange your disks' directories.  
**Nibler** — Maneuver your small (?) worm through a maze.  
**Solitaire** — Lost your deck of cards? Well, pull up a chair and enjoy a great game of solitaire.  
**DOP (Disk Operations Program)** — An invaluable aid for commonly-used disk commands.  
**A Matter of State** — A fun way to find out exactly how much you know about the U.S.A.  
**Sprites for the 128** — A collection of programs that help manage sprites on the new C-128.  
**MultiScreen** — Now you can create and use text screens in your own programs.

## ISSUE #18 (Continued)

- Pygmalion** — A self-improvement program that uses subliminal messages.  
**COM64 Grapher** — Create impressive presentations with this useful program.  
**Computer Eyes Review** — A detailed review on the operation and uses of a popular digitizer.  
**PEEKs, POKEs, and SYSeS, Parts 40-41** — A new beginning look into the art of music on the C-64.  
**COMAL Corner, Part 11** — Another interactive tutorial on COMAL 0.14 (not required).  
**The Comet Cometh** — A graphic program to help you locate Halley's in the sky.

## ISSUE #19 (One Disk)

- Movie Mogul** — Cast a few movies and find out if you are a budding Spielberg.  
**Christmas Jukebox** — A few of your old favorites for this time of year.  
**Toccata & Fugue** — A wonderful piece of music with a long computer history.  
**Script Text** — Place italic or cursive letters on your screen.  
**BLOAD** — A utility to make loading from a BASIC program much easier.  
**Computer Christmas Card** — A small snow scene for your new C-128.  
**Headliner** — Create banner printouts (or wallpaper!) that will make tomorrow's headlines.  
**INSTR-128** — Make searches easier than ever with the BASIC 7.0 of the C-128.  
**Periscope** — You will see that animation is possible even without sprites!  
**Letter Getter** — Find the letters and form words in this uniquely computeristic game.  
**Halley's Solar Sojourn** — Get another glimpse of our little visitor.  
**Math Reflections** — This month's subject is the mathematical art of making a pi.  
**ONE** — A great version of the popular game of "Uno."  
**PEEKs, POKEs, and SYSeS, Parts 42-43** — A continuing look into C-64 SID sound.

## ISSUE #20 (One Disk)

- Gold Grabber** — Collect all the gold you can without falling to your death.  
**LOADSTAR Retrospective Jukebox** — A look back at *Loadstar's* musical history.  
**Lone Ranger Theme (Wm. Tell Overture)** — A wonderful rendition of an old favorite.  
**Math Facts** — Teach the little ones math basics in this excellent example of education software.  
**Auto Line Number** — A small utility for automatically setting up line numbers in your programs.  
**Space Gorn** — Beware of the deadly Gorn as you explore a new world filled with danger and mystery.  
**Control Q.** — Excise that nasty quote mode at the touch of a key.  
**Scrambler** — Who can tell what this one does?  
**Datastater-128** — Make data statements out of memory on your C-128, +4, and 16.  
**Morning Coffee** — With hardware, you can let your C-64 make coffee and turn on the house lights.  
**SpriteSeer 2.0** — View all the sprites on your C-128 in this improved version of *SpriteSeer*.  
**PEEKs, POKEs, and SYSeS, Parts 44-47** — We finish our quick lesson in sound and music.

## ISSUE #21 (One Disk)

- Category Showdown** — A "Jeopardy"-like reverse-trivia game with 60 categories to choose from.  
**Disk Frisk** — The most advanced and comprehensive disk block editor ever for the C-64.  
**Phrase That Pays** — The C-64 version of "Wheel of Fortune."  
**Punch** — An entertaining test of your reflexes.  
**Actionaids** — Program robots to form unique games in this game construction set.  
**Cryptogram** — Challenge your opponent to decode your messages.  
**PGM (Program Graphics Management)** — A graphics operating system.  
**LOGO Eliza** — LOGO's ability to process your inputs in English becomes your personal therapist.  
**Spacedog Trainer** — Carefully land your space ship while avoiding the space debris.

## ISSUE #22 (One Disk)

- Arachnia** — Protect your web from invading spiders in this challenging arcade-style game.  
**Haunted House** — A spooky text adventure game.  
**Ginny 64** — Your computerized opponent plays a spirited game of gin rummy!  
**Area Code Finder** — Produce a list or display the location covered by any area code you enter.  
**Convert All** — English or metric, Fahrenheit or Celsius, and decimal, hex, or binary number conversions.

## ISSUE #22 (Continued)

- LOADSTAR Jukebox** — *Loadstar* brings you a collection of favorite tunes.  
**Gallerie d'Art** — This month's exhibit focuses on four El Greco paintings.  
**C-128 Token Translator** — Run programs originally created in BASIC 4.0 with this utility.  
**Any Printer** — Translate graphic characters and BASIC tokens into English or ASCII.  
**Magazine Filer** — Store and retrieve abstracts of favorite magazine articles.  
**Directory Alphabetizer II** — Produce several types of useful disk directories for screen or printer.  
**Income Tax Helper** — Double-check your tax return and see if you can save some money!  
**Fast Life** — A quickly-evolving version of the classic game of *Life*.  
**Multi-Color Graphs** — Harness the powerful graphics capabilities of the C-128 to create pie charts.  
**Math Reflections** — Topics include the Central Time Theorem and a program to test RND(x)'s uniformly.  
**Through the Looking Glass** — A series on the effects of computers on society: "Cargo Cults."

## ISSUE #23 (One Disk)

- CyberMine** — Renegade robots are threatening a vital mining operation in this text adventure.  
**Up Your Alley** — Challenge your bowling skills in this realistic bowling simulation.  
**Trig Calc** — Calculate sine, cosine, and tangent functions as well as side lengths for right triangles.  
**Editor in Chief** — Create your own fonts or use 1 of 7 fonts already provided for your own programs.  
**Stock Analyzer** — Keep track of over 100 stocks in 4 different markets, and even graph performance!  
**Through the Looking Glass** — Series on the effects of computers on society: "The Silicon Muse."  
**Gallerie d'Art** — This month's reproductions and commentary focus on the work of M.C. Escher.  
**Assignment Sheet** — Print a form to help students keep track of their school assignments.  
**1, 2, 3, Disk Directory** — Print directories in three columns on a single 80-column page.  
**Joggers** — You must have nimble feet to avoid the obstacles littered throughout this arcader.  
**Pachyderm Panic** — See if your memory is as great as the elephant's.  
**MemGraph** — A graphic representation of memory usage and efficiency.  
**56 Sprites** — Use roster interrupts to display 56 sprites on the screen simultaneously.  
**Screen Mover** — Save screens of information and swap them in and out at a moment's notice.  
**Disk Utility** — A menu-driven utility for copying, scratching, and renaming files quickly and easily.  
**128 Character Editor** — Design your own characters and entire fonts for the C-128.  
**RETURN Stripper** — Delete CR's from downloaded text files so they can be read by your word processor.  
**DB's Cheapsheet** — Make your own keyboard overlays with useful programming information.

## ISSUE #24 (One Disk)

- All Smiles** — You won't be down in the mouth after playing this challenging maze game!  
**Gallerie d'Art** — This month's reproductions and commentary feature the works of Michelangelo.  
**Abstract for the C-128.** — Turn your monitor into a continual display of beautiful abstract images.  
**Rotation Tag for the C-128** — Tag seven billiard balls with your cue ball in this arcader.  
**Commodore-128 Drawing Tablet** — Create beautiful images with a joystick and keyboard inputs.  
**ArcheType for the C-128** — The first of a two-parter on the construction of a powerful word processor.  
**Astro** — This celestial almanac puts a wealth of astronomical information at your fingertips.  
**Through the Looking Glass** — "Assertiveness Training for the Computer Age."  
**Family Record Sheet** — Print a two-page form perfect for listing genealogical information.  
**PayCheck** — Use your computer to keep track of your personal payroll information.  
**Speed Boat Race** — Maneuver your speed boat around islands and over jump ramps.  
**Perfect INPUT** — Add commands to BASIC which help overcome some of the limitations of INPUT.  
**Inside the 1571 Disk Drive** — Get the most out of Commodore's 5.25" disk drive.

## ISSUE #25 (One Disk)

- Nature Quest** — A stunning graphic foray into one of nature's most unusual niches.  
**Debris** — Sign up now to be an asteroid-shooting space jockey!  
**Gallerie d'Art** — A focus on the works of the 20th century surrealist, Rene Margritte.  
**Dungeon of the Dragon** — Sword at the ready, shield raised, tongue in cheek!

## ISSUE #25 (Continued)

- ArcheType for the C-128** — Second of a two-part series which completes a powerful word processor.
- File Cabinet** — Let this program relieve and organize your paper blizzard.
- Battle 64** — A two-player tank game requiring both strategy and reflexes.
- Spider Trap** — A damsel-in-distress needs saving from a spider's lair in this "captivating" arcade game.
- Rotate Sprites** — Rotate and flip sprites without redesigning them.
- Variable Saver** — A wedge program which saves your BASIC variable data while you are debugging.
- Fast Sprites** — A utility which allows you to move your sprites 16 times faster than the PEEK-and-POKE method.
- Sound Advice** — A sound editor which lets you create music and sound effects with the C-128.

## ISSUE #26 (One Disk)

- Micro Melodies** — A wide-ranging musical collection guaranteed to please any music lover.
- Pyramid Power Struggle** — The classic peg game with a touch of political intrigue added.
- All Smiles Maze Maker** — This a-maze-ing program lets you design your own maze games.
- Sandy's Glue Guide** — Know always which glue you should select for a particular job.
- Hostage** — You have one hour to free a bank president held hostage by five terrorists.
- Print Shop® Images** — Use with Brøderbund Software's *Print Shop®* program.
- Equestrian 64** — Guide your trusty steed over a treacherous steeple chase.
- Pardon My Interruptions** — Three enlightening examples of "interrupt-driven" programs.
- Self-Replication** — Our version of the mathematical model of Life.
- Define RUN-STOP/RESTORE** — Disable the STOP key and program it to do what you want it to do.
- Typewriter 64** — Use your Commodore 64/1526 printer combination as a typewriter.
- Game Design, Part 3** — You'll like the program which transfers graphics from Koala Printer/Micro Illustrator.
- Memory Window** — "PEEK" into the inner workings of your Commodore 64's memory.
- 128 Disk Editor** — Read, edit, and write to every sector on your disk!
- BASIC Scanner 128** — Scan your programs for tokens and variables that can cause problems for BASIC 7.0.

## ISSUE #27 (One Disk)

- Glory Quest** — WANTED: Treasure hunters to explore the dungeons of a haunted castle.
- Appointment Secretary** — A computerized calendar to keep track of important dates through the year 2099.
- All Base Calculator** — Add, subtract, multiply, divide, and display the correct answer in any base.
- SAVEing and LOADING the C-128 Graphic Bit Map** — All the routines you need to do just that!
- 128 ESCape Sequences** — Some of the escape sequences on the C-128.
- Screen Banner** — Scroll a message across the screen without affecting another program which is running.
- 3-D Sprite Scrolling** — Special tools makes sprites seem to move toward the viewer or toward the horizon.
- Cursor Byter** — Move the cursor to any position on the screen, no matter where or what!
- PreBase** — Add to BASIC some of the desirable features of structured languages.
- Disk Master '86** — Put over 100 disk directories into a single master directory.
- Muzik Maker** — Add interrupt-driven music to your programs or create the tunes themselves.
- Strings Attached** — Two programs demonstrating the usefulness of string concatenation.
- The Search for Sherlock Holmes** — The world's greatest detective has been kidnapped!
- The Mad Poet** — Welcome to the strange world of computer-generated poetry!
- Phone Words** — Convert letters found in phone numbers to their numerical equivalents.

## ISSUE #28 (One Disk)

- Memo Writer** — A simple word processor which automatically places what you type into memo format.
- The Investor** — Keep track of your stock investments and your capital gains.
- Loan Calculator** — Produce amortization tables for your loans.

## ISSUE #28 (Continued)

- UnSCRATCH** — Save that file you inadvertently "scratched."
- MiniTerm 128** — A machine language driver for BASIC terminal programs.
- Magic Lantern 128** — A demonstration of an animation technique possible on the C-128.
- Speed Read** — A program designed to increase your reading speed and comprehension.
- Jungle** — Avoid rampaging beasts while trying to gain a precious gem.
- Moon Base** — An entertaining arcader and a demonstration of important programming techniques.
- Sprite Puzzle 128** — Create challenging — perhaps impossible! — jigsaw puzzles.
- Micro Melodies** — Six pieces from the works of J. S. Bach, John Williams, and Emerson, Lake, and Palmer.
- Print Shop® Images** — A collection of logos from all 26 Major League baseball teams.
- Biorhythm 64** — Find out if your physical and emotional well-being is *really* affected by cycles.
- Guess the Number** — A novelty program in which you can feign great powers of recognition.

## ISSUE #29 (Two Disks)

- Spy's Demise** — Solve a mysterious cryptogram and avoid nasty KGB agents!
- Speed Reading Plus** — A demo of LSE's speed reading package.
- NuBASIC** — Use these new advanced BASIC commands in your own programs.
- Screen Grabber** — Generate the BASIC code necessary to print a custom screen.
- C-64 Print Buffer for the Amiga** — Your new Amiga and your "old" 64 can work together!
- Print Shop® Images** — A collection of logos from all 28 NFL football teams.
- Panda-monium** — An animated, close-up look at the beautiful, endangered giant panda bear.
- Through the Looking Glass** — An interview with Richard Garriott: "Monsters and Microchips."
- Connectoids** — If you can count to four, you already know the basics of this arcade-style game.
- Alfredo's Lost Cause** — The second in our series of humorous computer-animated adventures.
- Amiga Beachball for the C-128** — Construct the famous "Amiga ball" with your C-128.
- Jiffy Jotter** — Jot down all your great thoughts with this handy notebook program.
- Credit Card Information** — Keep track of all your vital credit card information.

## ISSUE #30 (One Disk)

- Klondike Solitaire** — The computer version of the classic card game for you to play in your spare time.
- Pick-Up Blocks** — A simple, though surprisingly challenging, logic puzzle.
- 100-Mile Race** — Guide your car over winding roads and around inattentive pedestrians.
- Sign Language** — A tutorial on the signing of the letters of the alphabet.
- Periodic Table** — One of the most important tools available to the beginning chemistry student.
- Phone Messages** — Print out a handy sheet for recording vital information.
- Modern Answering Machine** — Log messages sent to your computer via your modem.
- Print Shop® Converter** — Convert graphics between the two formats used in the Brøderbund product.
- Laser Show** — Observe kaleidoscope-like graphics while listening to nine beautiful SID synthesizer songs.
- C-128 Spectacular** — A graphics display demonstrating some of the power of BASIC 7.0 commands.
- Windows** — Use this program to define windows on the screen.
- Custom Characters** — ML routines that you can use to redefine characters in your own programs.
- Edit Wedge** — Search a program for a variable or literal, re-sequence line numbers, and more!
- EasyDATA 128** — Redefine the numeric keypad to speed up the entry of DATA statements.

## ISSUE #31 (One Disk)

- Dungeon of Namos** — Fight your way through an evil horde to find the Cirlet of Power.
- Othello** — Play against the computer or a human in this version of the classic strategy game.
- E.S.P.** — A computer adaptation of a widely-used clairvoyance test.
- BASIC Clock 128** — Now your C-128 can give you the time of day!
- Sprite NuBASIC** — Commands to make advanced sprite graphics easy.
- Sprite Editor** — Use this sprite editor to design your sprites for **Sprite NuBASIC**.
- Mobsters** — Twenty-six whimsical sprite shapes based on letters of the alphabet.
- Light Pen Demo** — A program demonstrating how a light pen can be used to draw on the screen.

## ISSUE #31 (Continued)

- Light Pen Othello** — A light pen version of the popular strategy game.  
**Kaleidoscope** — A graphics program which shows off the color capabilities of the C-64.  
**Slideshow Maker** — Display graphics made with most of the popular graphics packages.  
**LADD (Loadstar Against Drunk Driving)** — We point out some attitudes that might lead a person to DWI.  
**Creeping Chromosomes** — Alter computer-generated chromosomes for the best survival odds.

## ISSUE #32 (Two Disks)

- Approximator** — A utility for having your program accept "almost right" answers.  
**MemGraph 128** — Create a graphic representation of how a BASIC 7.0 program uses RAM.  
**Personalizer** — A utility that allows you to personalize messages and prompts to say anything you want!  
**QuantumLINK™** — All the software you need to access the official Commodore online service!  
**Bingo Construction Set** — This program, a C-64, and a printer are all you need to host your own bingo game.  
**Magic Metronome** — A program to help beginning musicians keep the beat.  
**Children** — Print out forms to help you keep up-to-date information on your children.  
**Visi-Calculator** — Perform the usual arithmetic operations, plus logical ANDs, ORs, and NOTs.  
**Weather Conversions** — Calculate the wind chill factor, heat index, and other useful conversions.  
**Alfredo's Transport Trouble** — The first half of episode two in a series of humorous animated cartoons.  
**Print Shop® Conversions** — A quick look at the two types of Commodore Print Shop images.  
**Print Shop® Images** — Images of all fifty states to add to your Print Shop library.  
**Born in the U.S.A.** — A quiz to test your knowledge of U.S. geography and history.  
**Dragon Chase** — Your mission in this arcader: to rescue a princess from a horde of deadly beasts.  
**Astro Wars** — Engage an enemy space fighter in a duel to the death.  
**Watch Your Language** — Add words to stories before you know their plots in this "Mad-Lib"-style game.  
**Gobbler** — A Pac Man-like arcade-style game.  
**Wheel** — A "guess-the-word" game sure to remind you of the popular TV show.  
**Yahtzee** — A computerized version of the popular dice game.

## ISSUE #33 (One Disk)

- Print Shop® Images** — A collection of logos of the National Hockey League teams.  
**Alfredo's Laser Lament** — The second half of episode two in our continuing series of humorous animated cartoons.  
**Super Sweep 128** — Translate CP/M and MS-DOS text and data files to C-128 format.  
**Letter Right** — A simple word processor for the C-64.  
**CW Trainer** — Train for the Morse Code test administered to HAMS by the FCC.  
**Conundrum** — A deceptively difficult test of logic.  
**Division Tutor** — A simple math drill for young children.  
**Addition Master** — Create and solve alphabetic puzzles in which letters symbolize digits.  
**Border Patrol** — Jazz up your programs with moving borders around menu and title screens.  
**Vertical Bar Demo** — A demonstration of ways you can implement vertical bar charts.  
**SX Drive Renumber** — A simple utility for designating drive numbers in an SX-64 system.  
**Back to the Future** — A selection of music from the works of Johann Sebastian Bach.  
**The Jig Is Up** — A St. Patrick's Day special: randomly-generated jigs and reels!  
**Tug 128** — This computerized version of tug-of-war rewards quick reflexes rather than brute strength.  
**No-Res Hangman** — A version of the familiar word game for children and adults alike.

## ISSUE #34 (One Disk)

- A Peek at Dispute?'s Gazette** — An April Spool Foo of one of our competitors.  
**Calendar Maker** — Print out a full-page calendar for any month of any year.  
**Telephone Lister** — Keep track of your most frequently-used telephone numbers.  
**Hi-Res Helper 128** — A simple drawing program for using your C-128 as a sketch pad.  
**Printer Maze** — Print out hundreds of different maze patterns!

## ISSUE #34 (Continued)

- Magic Music Box** — A music processor that plays simple musical compositions in various ways.  
**Inter-Melody** — A tool for adding interrupt-driven music to your own programs.  
**Pixel Puzzler** — Can you piece together this beautiful hi-res picture?  
**Falcon and the Enemy** — An arcade adventure which pits your Falcon spacefighter against an alien horde.  
**SDI "Star Wars" 128** — Defend your cities against incoming nuclear missiles.  
**The Moonlight Zone** — Sinister "Moonbeams" have imprisoned you in a high-rise apartment.  
**Smoke-Busters 128** — You are sent on an anti-smoking crusade in this unique arcade-style game.  
**BASIC Macro Processor** — Incorporate macros into your own programs with this BASIC processor.  
**Interfacing the User Port** — Short demo programs to accompany the article in *Commodore Magazine*.  
**The Clock** — Add an interrupt-drive digital clock anywhere on your screen.  
**Instant LOAD and DIRECTORY** — Add a full-featured directory and disk command to BASIC.  
**Program Security** — Guard your BASIC programs with a password security system.  
**Upgrading to the C-128** — A demonstration of some of the C-128's graphics capabilities.  
**Beginner's Guide to Burst Mode** — A short program demo-ing the speed of the 1571's burst mode.  
**Mirror** — A short sub-routine which creates a mirror image of the C-64 character set.

## ISSUE #35 (Two Disks)

- Bouncing Kamungas™** — There's trouble in the melon patch in this engaging arcader from Polarware™.  
**Time Zone** — This utility for converting local time to GMT is ideal for ham radio operators and amateur astronomers.  
**Dial A Word** — Convert telephone numbers to their letter equivalents.  
**Anagram Helper** — List all possible letter combinations in words up to eight letters long.  
**Mindbender** — A minimum of 46 moves will solve this baffling puzzle.  
**Hexapuzler** — A challenging "slide-the-tile" game.  
**Print Shop® Images** — A collection of images devoted to an American passion: the automobile.  
**Grassroots Jukebox** — A compilation of favorite bluegrass tunes.  
**Moving Walls** — Passageways constantly change in this extraordinary maze game.  
**Cave of the Reaper** — Escape the Reaper's lair in this tongue-in-cheek text adventure.  
**Mr. Mailman** — The *mail* must go through — despite two bloodthirsty mutts prowling your route!  
**Sprite Printer 128** — Print hard copies of your sprite collection.  
**Disk Locker** — Protect your programs against accidental erasure.  
**MultiWindows** — A demonstration of how windows can be used with the C-64.  
**Universal LISTer 128** — List your BASIC 4.0 programs and translate tokens to their BASIC 7.0 equivalents.

## ISSUE #36 (One Disk)

- Financial Calculator 128** — Figure loan payments and balances as well as standard math functions.  
**Envelopes** — A simple word processor for addressing envelopes.  
**Subliminal Messenger** — Can subliminal messages really help people stop bad habits?  
**Relatively Speaking** — The Theory of Relativity contends that strange things happen near the speed of light.  
**Flags to the Wind** — A quiz on the flags of all fifty U.S. states  
**Picture Puzzler** — Can you piece together the parts of this lovely "Wilderness Scene"??  
**Ragtime Jukebox, Part 1** — A compilation of favorite ragtime tunes.  
**Pink Elephants** — Beware! The pink elephants in this arcade game *aren't* hallucinations!  
**Shiver Me Timbers** — A text adventure set on a seemingly-deserted island.  
**Variable Dump** — A handy debugging utility for finding the value of all system memory variables.  
**KeyBeeper** — Have your computer "beep" each time a key is pressed.  
**128 Appender** — A utility to simplify the appending of subroutines to programs.  
**Renumber BASIC** — A tool for renumbering BASIC programs.  
**Line Locker** — A C-64/128 utility to prevent scrolling the top screen line.

## ISSUE #36 (Continued)

**Print Screen** — A screen-dump program which prints text screens with a single keypress.  
**Pointer Demo** — A demonstration of BASIC 7.0's powerful POINTER feature.

## ISSUE #37 (Two Disks)

**Founding Fable** — Syndicated columnist Dan Gutman takes a sly look at history.  
**Concentration 128** — A computerized version of a favorite memory game.  
**Color Match** — A color-coordinated logic test.  
**Ragtime Jukebox, Part 2** — Another compilation of favorite ragtime tunes.  
**ADSR Tempo Tables** — A handy tool for programmers adding sound to their programs.  
**Thousand Miler** — Test your wits rather than your reflexes in this hi-res version of *Mille Borne*.  
**Blimps** — Guide a parachutist through a gauntlet of deadly barrage balloons.  
**Pari-Mutuel Racing** — Place your bets, then watch computerized horses break for the wire.  
**King of the Jumble** — Send ciphered messages—or break existing ciphers.  
**Enigma** — Emulate the Enigma cipher machine used by German forces in World War II.  
**64-Mode Numeric Keypad 128** — Use some of the C-128's special keys in C-64 mode.  
**Getting it Straight** — Fine-tune the shape of C-128 pixels to produce high-quality graphics.  
**Total Control** — A subroutine to eliminate problems associated with BASIC's INPUT statement.  
**Build a Better Bubble** — A demonstration of five different bubble-sorting routines.  
**Color Flipper** — Change text colors on your screen in a flash!  
**DELeTe Right** — Change the F7 key into a Right DELeTe key with this routine.  
**DIRectory/BLOCKs Free Viewer** — Two routines which display disk directory and blocks free information.  
**Grafix Galore** — We present the winners of *Commodore Magazine's* 1986 computer art contest.  
**Tabula Rasa 128** — An aid to Koala Pad users in designing sprites and drawing on the C-128 hi-res screen.  
**Using Koala Pics 128** — A small utility which demonstrates how to BSAVE and BLOAD Koala pictures.  
**Packer/Unpacker** — Tools for compacting and displaying hi-res images.

## ISSUE #38 (One Disk)

**Ragtime Jukebox, Part 3** — Another collection of classic ragtime music.  
**MIDIsend** — A musician's introduction to the Musical Instrument Digital Interface (MIDI).  
**Bingo Simulator** — Everything you need to host your own bingo game!  
**Calendar Maker** — Print monthly calendars for years past, present, or future.  
**Ultimate File Viewer** — A tool for reading and printing sequential text files.  
**Window Mania 128** — A demonstration of window routines you can use in your own programs.  
**AutoRUN** — Create a BOOT program which automatically LOADs and RUNs BASIC or ML programs.  
**String Magician 128** — Convert string characters from PETSCII to ASCII and vice versa.  
**Teletype Message** — Display your program's output like a teletype machine by using this subroutine.  
**C-64 Compressor** — Squeeze any area of RAM to crunch long sequential files or pack high-res pics.  
**1541 Disk Stamper** — Include a two-line message in a 1541 disk's block allocation map (BAM).  
**Dugan's Art Depot** — Captivating hi-res images from a talented computer artist.  
**What Goes Here?** — A simply-designed program to challenge a young person's memory.  
**Tinted Tiles** — A colorful "slide-the-tile" game.  
**Alphabet Trainer** — A tutorial to help young children learn the letters of the alphabet.  
**Jupiter Jump** — An arcade thriller in which your spaceship is pitted against four deadly Jovians.  
**Radio Search** — Use high-tech electronics equipment to locate the terrorists' lair.  
**Chopper Pilot** — Pilot a helicopter on a dangerous rescue mission.

## ISSUE #39 (One Disk)

**Zorphon** — Protect your ship from galactic invaders in this fast-action game.  
**Castle Siege** — Use a catapult and five boulders to seize an ominous castle.  
**Budget Report** — Print out work sheets to help you figure your budget.  
**LOADer Maker** — Create a menu that will LOAD and RUN your favorite programs.  
**Connections 64** — Scroll credits on your screen.

## ISSUE #39 (Continued)

**Connections 128** — Display a test pattern on your screen.  
**Printing Lab** — Create custom letterhead and greeting cards with your CBM-1525 and compatibles.  
**Envelope Master** — Print forwarding and return addresses on your envelopes.  
**Story Writer 128** — Spark your creative writing efforts!  
**Wind Chill Calculation** — Calculate the wind chill factor with this handy utility.  
**Boot 64** — Learn how to install "security codes" in your own programs.  
**MIDI Hacker** — View data coming from the MIDI ports.  
**Graph Paper Maker** — Turn your computer paper into graph paper!  
**Towers of Hanoi** — The classic oriental mind game.  
**Word Search Creator** — Solve six word puzzles, or create your own with words you supply.  
**Random Walk 128** — "Walk" randomly around a make-believe city.  
**Harmonizer 128** — Create three-voice music with this program and an 80-column text display.  
**Happy Birthday 128** — Let your 128 play everyone's favorite "celebration tune."  
**Print Shop® Images** — A collection of animals large and small.

## ISSUE #40 (Two Disks)

**Pensate™** — The original, complete hit strategy game from Polarware/Penguin™.  
**All Smiles** — New mazes created by Dave Rosenstein for one of our most popular games.  
**Ohm's Law** — Electronics buffs will enjoy this program for figuring Ohm's Law equations.  
**Farmer's Market** — How to plant vegetables for maximum yield.  
**Error Aid** — A programming tool that explains C-64 error messages as they occur.  
**Pixel Puzzler** — Piece together this hi-res picture.  
**Dugan's Art Depot** — Commodore 64 art at its best!  
**Print Shop® Composite** — Display screen-size pictures of several Print Shop images.  
**Beginning Bytes** — Learn how to LOAD and SAVE programs and display a disk directory.  
**Byte by Byte** — Learn how to read SEQUential files using BASIC.  
**Bit by Bit** — Learn how to read SEQUential files using Machine Language.  
**Sound Synthesizer** — Create a BASIC program to re-create a special sound you have designed.  
**LIST Patrol** — Find any word or character in a BASIC program.  
**Lullaby** — Take a break while your 64 plays your favorite sleepytune.  
**Spot Shot** — Shoot the moving spot as many times as you can before time runs out.  
**Instant Term** — Gain immediate access to an ML terminal program.  
**Math Puzzle** — Solve alphametic equations.  
**GenSprite** — Create sprites with this BASIC editor.  
**SEQ Edit** — A useful tool for creating and editing sequential files in 80-column format.  
**Join Four** — A computerized version of the popular "four-in-a-row" game.  
**Big League** — Create your own teams in this statistical baseball game.  
**Matches** — A simple match-the-words game.  
**Math Help** — An educational math aid for youngsters.  
**Window Demo 128** — Restore text erased by the C-128's windows.  
**Auto-Answer Disable** — Disable the auto-answer "feature" (bug) on your 1670 modem.

## ISSUE #41 (Two Disks)

**Asteroid Storm** — One player blasts enemy ships; the other attempts to rendezvous with an asteroid.  
**King Arthur's Quest** — A witch has cast a spell on King Arthur in this text adventure.  
**Pixel Puzzler** — Unscramble a multi-color picture.  
**Banner** — Create banners with your printer.  
**Snag** — Print any portion of your text screen with this pop-up screen-dump utility.  
**Quantum Link™ Terminal** — Connect to the official Commodore on-line service with this program.  
**Print Shop® Images** — A collection of "3-BLOCK" sports images.  
**Beginning Bytes** — Learn how to communicate with your disk drive.  
**Byte by Byte** — Fix the bugs in BASIC's INPUT statement with this BASIC subroutine.  
**Bit by Bit** — Fix the bugs in BASIC's INPUT statement with this quick and useful ML subroutine.  
**Sounds of Q-Link™** — Old-time music taken from the official Commodore on-line service.

## ISSUE #42 (One Disk)

- Mozart Jukebox** — A collection of Wolfgang's greatest hits in our classiest jukebox yet!  
**Print Shop® Images** — Fancy shadow numbers and letters.  
**Slam Pinball** — A fast-action pinball game that has more flippers than Shamu!  
**Worm X-ing** — Control your wiggler in this frantic arcade game.  
**Two-in-One** — Edit and run two BASIC programs at one time!  
**File Verifier** — View a disk map and discover how each block and sector is used.  
**Small DOS** — A "wedge" that won't conflict with any of your other utilities.  
**Home Sale** — Find out if it is time to sell your home.  
**Calorie Selector** — Find out if "you are what you eat" is true.

## ISSUE #43 (Two Disks)

- Expedition Amazon™** — Lead your intrepid band of explorers up the Amazon to the Lost City of Ka.  
**Darkhold** — Search four levels of goblins and basilisks for the four pieces of the Talisman.  
**Video Poker** — The all-time favorite high-stakes card game for one to four players.  
**Sector Editor** — Examine your disks directly with this essential programmer's tool.  
**Anna's Gram** — Unscramble words to solve the riddle in this puzzle-within-a-puzzle.  
**Loadstar Challenge** — Enjoy the explanations as much as the questions in this trivia-twist game.  
**Sliding Checkers** — A fiendishly-frustrating tile puzzle which is not for the impatient!  
**3-D Converter** — Have you ever wondered how much a room full of lead weighs? Or mercury?  
**Print Shop® Images** — More dazzling images from various submitters.  
**Cross Search** — A combination word search/crossword puzzle to intrigue you.  
**Compare** — Quickly spot slight changes in varying versions of the same program.  
**Auto-Con** — Convert any number into hex, binary, decimal, or ASCII.  
**Big League 128** — Manage your favorite team in this statistical baseball game.

## ISSUE #44 (Two Disks)

- Alfredo's Digestive Dilemma** — The fourth in our series of humorous animated cartoon adventures.  
**Lüscher Color Profile** — The colors you like indicate more about you than you may care to admit!  
**Loadstar List** — A handy index to all programs published on *Loadstar* last year.  
**Sousa Jukebox** — Seven of the "March King's" most familiar martial melodies.  
**Hi-Res Converter** — Convert graphic images from one format to another.  
**Jump!** — Several intriguing variations of the popular jump-the-peg puzzle.  
**Murder in the Museum** — You become Inspector la Mort of the Surete in this text mys-adventure.  
**Desert Trader** — If you can buy low and sell high, you might survive to tell the tale.  
**Fuel Gauge 128** — Decide if you should heat with gas, electricity, or wood.  
**Castrovia** — A two-player strategy game for those who like battles, castles, peasants, and taxes.  
**Custom Screen** — Design and save a screen to disk the easy way.  
**Pare a Phrase** — A word-guessing game for two to four players.

## ISSUE #45 (Two Disks)

- Harned's Art Hotel** — View ten captivating hi-res pictures.  
**Puzzle-Maker** — Easily create your own word-search puzzles, and save in ASCII or SpeedScript™.  
**Auto-Menu** — A generic menu system which allows you to run any file on any disk quickly and easily.  
**Son of Sousa** — Our second installment of memorable tunes by the "March King."  
**Word Bowl** — Put away your bowling ball and get out your thinking cap!  
**Upside Down** — If you solve the first puzzle, don't feel too smug — the second one's a doozy!  
**Dragonwick** — Collect as much gold as you can before the dragon and other foes get you!  
**Kamikaze Duck** — Catch the crazy duck in this sprite-filled arcade game.  
**L'il Helper** — View other listings without erasing your current program from memory!  
**Vocab** — A tutorial and a vocabulary quiz.  
**Screen Save 128** — Save a screen and recall it when you need it again.  
**Variable Finder 128** — Keep track of all your variables.

## ISSUE #46 (Two Disks)

- History of SOFTDISK, INC.** — The heretofore *untold* story behind the company which brings you *Loadstar!*  
**Computer Juicer** — Turn your computer into a food processor.  
**Joe Bob Checks Out Loadstar** — A profound critique, as you can imagine!  
**One for One** — A classic card game.  
**Hugo 128** — Produce a movie for your VCR.  
**Tech Letters** — Try this new font on for size.  
**Easy Keys** — Redefine the C-64's function keys.  
**Code 64 and 128** — ASCII codes are just a keystroke away!  
**Fractals 128** — The latest mathematical toy.  
**Ear Trainer 128** — Learn to recognize musical intervals.  
**BridgeBrain** — Play contract bridge against your computer and polish up on your bidding skills.  
**Solitaire**: Two unusual solitaire card games which use a beautiful hi-res card deck.  
**Aces Up** — Another chance to beat your Commodore computer at its own game.  
**Match Me (If You Can)** — New version of an old favorite.  
**BASIX 64 and 128** — Two deluxe variable trackers for BASIC 2.0 and 7.0 programs.  
**Exterminator** — Let us get rid of bugs in past *Loadstar* programs!  
**Print Shop® Images** — Logos for three football conferences.  
**Desert Duel** — Your chance to become a tank commander!

## ISSUE #47 (Two Disks)

- Battleship** — It's arcade fun on the high seas!  
**Equations 64 and 128** — More about fractals, the new fractional-dimensional geometry.

**Utilizer** — DOS 5.1 commands and more!  
**Print Shop® Organizations** — Print Shop images of famous American club logos.  
**Murder in the Monastery** — Inspector la Mort's latest case!  
**Speller** — A fun, easy-to-use spelling game and tutorial.

## ISSUE #49 (Two Disks)

- NotePad** — Use invisible memory to write things down.  
**Pop-DOS** — Use handy pop-down DOS windows.  
**Chomp** — A mouse-driven game from *Scientific American*.

## ISSUE #49 (Continued)

- Animals** — This time, you teach the computer to think!  
**Joystick Art** — Use this joystick to create and save your screen.  
**Statistics Analyzer** — Learn about this much-misunderstood science.  
**Template Maker** — Take the guesswork out of F-key functions.  
**Tips and Tricks** — A collection of small but mighty routines for the C-64.  
**Invisible Aid 128** — BASIC 7.0 command-names at your fingertips.  
**Two Potato 128** — Q-Bert learns to spell.  
**Cris-Cros Poker** — Play ten games of poker at once!  
**Robot Rescue** — The Bronze Medal Winner in the CodeQuest '87 Contest.  
**Down, Down, Down** — The Silver Medal Winner in the CodeQuest '87 Contest.  
**Power Budget** — The Gold Medal Winner in the Code Quest '87 Contest.

## ISSUE #50 (Two Disks)

- Screen Switcher** — Make possible instant instructions screens for your programs.  
**Smush** — Compact program files, not just pictures.  
**Tempered Fun** — All about tempered and untempered musical tuning.  
**Modulation Wedge 128** — Add pulse-width modulation to BASIC 7.0.  
**SPRDEF-Plus 128** — New commands for the 128 sprite editor.  
**Hide 'N' Seek** — Shoot into a black box and see what comes out.  
**Video Craps** — Learn all about this Las Vegas favorite.  
**Astro-Calc** — A deluxe planet-finding utility.  
**Calendar Maker** — Print out a schedule for any month.  
**The Great Masters** — Music from the guys who invented it!  
**Harned's Creatures** — A slide show of famous science fiction creatures.

## ISSUE #51 (Two Disks)

- Total List** — Add new features to the BASIC LIST command.  
**Mailing Label** — An easy-to-run WYSIWYG label program.  
**Stratahex** — A strategic game played on a hexagonal checkboard.  
**Magazine Catalog** — Find any magazine article fast!  
**Tempered Fun** — A re-issue of last month's *Commodore Magazine* program on musical tunings.  
**Color Setup** — Try out different color combinations on your C-64.  
**Foolproof Files 128** — A general-purpose menu program.  
**Sir Tommy** — A game of "Old Patience."  
**The Toy Store** — Let your kids learn all about coins.  
**Alpine Escape** — It's mayhem on the slopes in this entertaining arcade game.  
**Edstar** — Our all-purpose, two-column word processor.  
**Catalog Tool** — Organize your directories like a pro.  
**Windows** — *Loadstar's* window routines explained in detail.  
**Text Printer** — Print out all of the ".t." files in *Loadstar*.  
**Print Shop® Images** — A set of lower-case shadow letters.

## ISSUE #52 (Two Disks)

- Print Big** — An easy-to-use text editor that lets you print BIG.  
**Spanish Easy as A-B-C** — A deluxe Spanish tutorial and quiz.  
**Mandelbrot** — Watch your C-64 create intricate Mandelbrot designs.  
**Bike Gear** — Improve the gearing on your multi-speed bicycle.  
**Easy-DOS-it** — A small DOS wedge to make disk upkeep a breeze.  
**Color Setup 128** — Easily find the perfect color combination.  
**Function Keys 128** — Re-program your function keys and save to disk.  
**Socrates** — Learn about the Socratic method and novels, too.  
**Transformation** — Copy colorful designs by jumping pegs.  
**Plan Ahead** — Duplicate a random design by moving the cursor.  
**Extermination** — Easily fix bugs in recent *Loadstars*.  
**Packer** — Crunch a DOODLE or KOALA picture into fewer blocks.

## ISSUE #52 (Continued)

- Vivaldi Jukebox** — *Four Seasons* and other times of the year.  
**Trail West** — Become a trail baron in this Old West simulation.  
**Quantumlink™** — A demo of the premier on-line service.

## ISSUE #53 (Two Disks)

- Morse Code** — Learn the code, then test yourself.  
**Roman Numerals** — A learning program for the LXXX's.  
**Logjam** — Save your rafting buddies from the sawmill.  
**Golf** — Spend the day on the links with your computer.  
**Mandelbrot 128** — The world's most complex graphic on your C-128!  
**Nimwit** — Two-dimensional Nim on a 4x4 checkerboard.  
**Paragon** — An ingenious eight-level variation of *Breakout*.  
**Print Shop® Images** — Patches from WWII's Army Air Force.  
**Font Customizer** — Create new fonts for your programs easily!  
**Cheap Hex** — Probably the best hex disassembler you've ever seen.

## ISSUE #54 (Two Disks)

- Star Copier** — The *Loadstar* file copier you have been waiting for.  
**Star Nibbler** — The full-disk copier you have been wanting.  
**Pivot Point** — Try playing checkers on a balancing beam!  
**The Challenge** — A chaotic though entertaining combination of Rubik's cube and chess.  
**Box Baseball** — Computer baseball in the old penny arcade tradition.  
**Video Pro-Title** — Add professional titles to your video tapes.  
**VCR Library** — Keep tabs on all your video tapes.  
**Sturgrat** — Level after level of strategic space action.  
**Tarot** — Find out what the cards have in store for you.  
**Night Mission** — You must plan ahead if you are to beat this version of *Soko-Ban*.  
**Chopin Jukebox** — Seven of the 19th century composer's best.  
**Henry's Art Hotel** — A different perspective on a variety of things.

## ISSUE #55 (Two Disks)

- Quick Titles** — How to make larger-than-life titles for your BASIC programs.  
**P-List** — Print out your BASIC listings in their most readable form.  
**Pokeless Sprites** — An easy way to use sprites.  
**Break-Fast** — The smallest *Breakout* ever!  
**Reach!** — A C-64 game for the quick thinker.  
**Sixpack Plus** — Add some life to your F-key.  
**DataMaker** — Turn ML routines into DATA statements.  
**Sea Battle** — Bomb first, and ask questions later!  
**Time Trial** — A Ben-Hur chariot race for sprites.  
**64 Timer** — Keep a clock on your screen at all times.  
**Restore Colors 128** — Change the default colors and messages.  
**Arabic to Roman 128** — Convert to a different number system.  
**The Cruciverbalist** — The ultimate professional crossword crafter and player.  
**Backgammon 64** — Try to beat your expert computer-opponent.  
**C-64 Rolloff** — Find out if the dice are rolling your way.  
**Cranberry Park** — Plan your dream park in spite of the commission's restrictions.  
**Poison** — Find the antidote or you're DOA!  
**Print Shop® AAF Badges** — Army Air Force awards and badges.

## ISSUE #56 (Two Disks)

- Exhibition Jukebox** — Mussorgsky's classic *Pictures at an Exhibition*.  
**Kaleidoscope** — A music and graphics extravaganza.  
**Meal Planner** — Plan your family's meals days in advance.  
**Personal Finances** — Keep track of your net worth the easy way.

## ISSUE #56 (Continued)

- TaxWise** — Fill out your 1988 tax forms with confidence.  
**American Dateline** — Find out how well you know dates important to Americans.  
**Graphbusters** — A two-player random maze game.  
**Castle of Spirits** — A small text adventure you can modify yourself.  
**Bogging** — Roll the letter cubes and make words as fast as you can.  
**Speed** — Play your cards right — and *fast!* — and you can beat the computer.  
**Pair Off** — Another card game for solitaire fans.  
**Golfer Arcade** — Practice your putting on greens where the holes move!

## ISSUE #57 (Two Disks)

- Window Magic** — Add eleven commands to BASIC that make creating windows easy.  
**Delphic Oracle** — Let the mystic Oracle answer your questions.  
**Sixty-Fore** — Miniature golf on a miniature scale.  
**Wiz-Bank 128** — An 80-column word processor that makes form letters a snap.  
**Sliding Blocks** — Seven variations of Sam Loyd's classic puzzles.  
**Guess Again** — A ten-category quiz that will inform and surprise you.  
**Fantasy Zone** — Twelve hi-res pictures that accentuate the weirdness of life in the universe.  
**Carbuyer's Scratchpad** — Make the best deal on your next new car purchase.  
**The Lost Crown of Queen Anne** — An excellent large text adventure.  
**Starquest** — Explore the galaxy and learn all sorts of amazing things.

## ISSUE #58 (Two Disks)

- Proof Reader** — Test your text for its readability.  
**Lunar Calendar** — Find the phase of the moon for any night.  
**BAM Organizer** — Take control of your disk directories.  
**Decision Maker** — A sure cure for your wishy-washiness.  
**Sequencer 128** — A two-player game that will test your memory and knowledge.  
**Snigglefritz** — Arithmetic has never been so much fun!  
**Murder One** — A graphic whodunit for the sophisticated armchair detective.  
**Print Shop® Borders** — Twenty-eight catchy new borders for your desktop publications.  
**Home Grown Music** — Seven original songs in a modern vein for your SID chip.  
**Master Input** — An ML routine that solves all of your keyboard input problems.  
**Sprite On!** — Sprites are easier than ever — even *animated* ones!  
**The Red Obelisk** — Try your hand at space-mining in this hi-res strategy game.  
**Oscar Party** — Throw a party on Oscar night and have a ball.

## ISSUE #59 (Two Disks)

- Cross-Reference** — Keep track of those pesky variables.  
**Civil War Jukebox** — North meets South in this musical collection.  
**Cliffhanger** — Become King of the Mountain in this arcade thriller.  
**Lifeboat** — Find your salvation in this text adventure.  
**Tangram** — An intriguing collection of ancient Chinese puzzles.  
**Solarscope** — Everything you ever wanted to know about the solar system.  
**Maze Chase** — A great one- or two-player maze game with a maze-maker feature.  
**Spheroid** — An exciting 10-level arcade game with even more sub-levels!  
**Civil War Leaders** — Learn all about the generals of the Blue and the Gray.  
**Civil War Trivia** — Challenge your friends to this fun trivia game.

## ISSUE #60 (Two Disks)

- Mug Shots** — Your friendly *Loadstar* team unmasked at last!  
**Capture** — Find the hidden flag in this 1- or 2-player board game.  
**Star Trip 128** — Defend your spaceship in this *Commodore Magazine* space shoot-'em up!  
**Digithunt** — Race against the clock while placing correct digits on a 9 x 9 grid.  
**Robin Hood's Gold** — Jump around within patterns formed by bags of real gold!  
**Parsin' Practice** — How well can you identify subjects and predicates?

## ISSUE #60 (Continued)

- Puzzle Page** — Mindbenders for your contemplation and entertainment.  
**Con Artist** — A useful graphics conversion program for the C-64.  
**DOS-Master** — A memory-resident directory manager and sector editor.  
**Outpost** — Protect cities from missile attacks in this *Missile Command* clone.  
**Aerohawk** — A fun graphics game complete with planes, bombs, tanks, and sprites.  
**Walt's Workshop** — The hi-res graphics master reveals tricks in a landscape drawing.  
**Astrographics** — Astronomy-related Print Shop® graphics images.

## ISSUE #61 (Two Disks)

- ML Relocator** — A BASIC utility for moving small ML routines around in memory.  
**Baseball Stats Book** — Keep daily records of an entire baseball league in this special database.  
**Domino Logic** — An intriguing, eight-level domino puzzle set on a graphic grid.  
**Shoot the Moon** — Play against three computer-driven opponents in this game of hearts.  
**Puzzle Page** — This month's collection of a variety of puzzles for you to solve.  
**Pro-Titler** — An upgraded version of a video titler program originally published on *Loadstar* #54.  
**Pro-Companion** — Use with *Pro-Titler* to design exotic fonts or graphic shapes for video titles.  
**VCR Library** — A re-published modification of a cataloging program for use with *VCR Companion*.  
**VCR Companion** — A fast database program for quickly locating titles in your *VCR Library*.  
**GEOS® Packer** — A program for packing hi-res and multi-color graphics with GEOS®.  
**Home Inventory** — A database for keeping track of everything in your home.  
**Great Masters II** — 19th century classical music transcribed with our new *Songsmith* program.  
**Melee** — Battle monsters and seek stolen treasures in the ancient city of Gilgamesh.

## ISSUE #62 (Two Disks)

- Stats Toolbox** — A tutorial demonstration of six statistical algorithms.  
**Cubik** — Learn how to solve your Rubik's cube step-by-step.  
**Political BS** — Test your knowledge of the U.S. Federal Government.  
**Puzzle Page** — This month's collection of interesting puzzles.  
**Chartstar** — A professional chart-making program for your C-64.  
**Wizard Duel** — Wizards shoot spells at each other in arcade-style battles!  
**Dir to Var** — Place your directory filenames in string variables.  
**Geolibrarian** — Print out Print Shop® images in columns or rows.  
**Henry's Art Hotel #2** — Multi-color images of dancers, birds, snakes, and other oddities.  
**Print Shop® Borders #2** — Another installment of catchy new borders.

## ISSUE #63 (Two Disks)

- Timer** — Save a file to your directory along with the current date and time.  
**Super 8** — A nine-number grid puzzle that will challenge your wits.  
**Famous Americans** — An educational multiple-choice American history exam.  
**Jeff's Top Ten** — Re-order lists of ten items a la Letterman's Late Night.  
**Puzzle Page** — Our monthly collection of entertaining puzzles.  
**Easy Checkbook** — Reconcile your check register and print your records.  
**Crystal Garden** — Generate colorful crystalline shapes with this drawing program.  
**Commodore Magazine's Graphics Winners** — A slide show of this year's prize-winning pictures.  
**Rainy Day Moon 128** — The phases of the moon for any date, any year.  
**Conquest** — Dominate the world in this Risk-like game.  
**Sentinel** — Contend with villainous aliens, an unyielding bank, and a shrewish wife.  
**Georeplicator** — A GEOS application for printing out multiple GEOPaint documents.

## ISSUE #64 (Two Disks)

- Crypto-Diary** — Store your daily thoughts in a file you can encrypt and edit.  
**Exterminator** — Get rid of bugs in past *Loadstar* issues.  
**Memphis Game 128** — A text adventure set on actual Tennessee highways.  
**Logic Cad** — Learn about electronic logic gates the graphic way.

## ISSUE #64 (Continued)

**U. S. Cities** — Identify the state to which each given city belongs.

**Puzzle Page** — Our monthly variety of challenging puzzles.

**Bowman** — Shoot straight while in a multi-level maze of bats and goblins.

**Bowman Maze-Maker** — Create mazes of your own for **Bowman**.

**Survive** — Your pet dragon's breath can slay anything, fortunately!

# LOADSTAR

## Personal Productivity Software for the Commodore 64/128<sup>™</sup> user For the Commodore 64 and 128 computers

### 64K Required (or 128 in 64 mode)

- ▶ Every month **Loadstar** brings you two diskettes filled with carefully selected quality software to help you get more value from your personal computer. Each issue contains an impressive variety of fun, useful, and interesting new things to do with your computer. The friendly interactive **Loadstar** format makes it a snap for everyone in the family to run programs quickly and easily.
- ▶ **Here's what they're saying...**
  - "Thanks much for an excellent product at the most reasonable price around. Your integrity, honest advertising, and value for price paid are, in a word, astounding!..." —R.P., Washington
  - "I just received my first issue of **Loadstar**, and I just wanted you to know it is excellent, superb...!" —J.O., Florida
  - "**Loadstar**...should dispel the adage about there not being any decent software available anymore at a decent price. I give **Loadstar** five stars." —McCook Commodore Users Group
  - "If you can afford only one disk service, make it **Loadstar**." —Commodore Microcomputers

### In This Issue... Two 5 1/4" diskettes featuring these programs:

#### MAIL BAG

by Barbara Schulak

Build your personalized address book, then sort and print mailing labels easily.

#### SCREEN MASTER

by Andrew Little

Create, save, and load text screens from within your BASIC program. A great utility!

#### MOVIE GRAM

by Barbara Schulak

Re-assemble scrambled syllables to create and solve a mystery movie anagram. Solution requires printer.

#### ANIMAL FARE

by Joel Epstein

Test your speed and skill in remembering shapes and colors. A collection of 12 fun tests developed by a psychologist.

#### ALPHABET ART

by Jack Penn

A slide show of illuminated letters of the alphabet that will dazzle you as well as help your children learn their ABC's.

#### MANCALA

by Dave Wilkerson

Hoard colorful "stones" in our version of one of the oldest strategy games known to man.

#### PUZZLE PAGE #70

by Barbara Schulak

Challenge yourself with three crosswords, a logic problem, and two new puzzlers, Duo and CryptoLists.

#### GEODELOREAN

by Jon Perregeux

A modern, stylish 18 and 24 point GEOS font.

#### MAGNETRON

by John Feder

Think fast! Prevent magnetized balls from falling into an arcade pit.

#### CORSAIR

by Jon Mattson

Fight, trade, and gamble your way through the futuristic cities of planet Alkanar IV.

#### PLUS

- ▶ **Discovery**—A greeting from the editor.
- ▶ **Jordan's Journal**—Mark Jordan talks power word processing.
- ▶ **Zero Page**—Three instructive programming articles.
- ▶ **Loadstar Review**—Here's a product we think you will like!
- ▶ **Loadstar Forum**—We answer and share last month's mail.
- ▶ **Loadstar Briefs**—Feedback Machine, Font Changer, Text Printer, and Loadstar Forms.

**50% OFF FOR LOADSTAR FANS ONLY!**

# *Just for Fun*<sup>TM</sup>

## **Eight brand-new games for your Commodore® 64!**

We have so many great games, we're almost giving them away! For only \$9.95, you'll get a two-sided, 5¼" disk filled with the kinds of games that have made the Commodore 64 and **Loadstar** legends in their own time. Each game is original and never-before-published—for brand-new Commodore fun!

Here's what you'll find on **Just for Fun**...

**Monster Power:**

Three games in one! Compete in a tractor pull, a monster truck jump, or a chug through a mud bog.

**Turtle Rescue:**

An arcade challenge! Build a ladder to your turtle-sweet heart, but watch out for rung-stealing spiders and acid rain!

**Solitaire Golf:**

A fast-paced card game! Reduce the number of cards in six six-card columns with fast, intuitive moves.

**Mathball:**

An educational motivator! Answer a math problem correctly to use the flippers in four fun-packed pinball games.

**PLUS... a vocabulary game and three more arcade games!**

## **That's eight games for only \$9.95!**

**SOFTDISK  
PUBLISHING**  
monthly software

Dear *Loadstar*<sup>TM</sup> subscriber:

Thank you for your subscription to *Loadstar* and welcome to the cutting edge of technology. Enclosed is your first issue and your free software premium.

During the next year, *Loadstar* will maintain its lead as the pioneer of disk magazines by providing you with new features and even better software. Your hardware investment will begin to pay off as you learn how to use new applications every month.

As you subscribe for longer periods, the price keeps coming down. In fact, if you subscribe for two years, the price falls below \$5 per issue! Please consider renewing or extending your subscription now so you won't miss a single program-packed issue of *Loadstar*. The issues you have missed are also available. Check the enclosed back issue catalog for a complete list.

Our staff is here to serve you. If you ever have a problem which our staff cannot solve to your satisfaction, please call me personally at 318-221-8718.

Yours truly,

Al Vekovius, President

# Technical Support from **SOFTDISK PUBLISHING**

---

Since our beginning in 1981, we at Softdisk Publishing have felt that our customers are the most important part of our business. This year alone, our customer service department has responded to over 5,000 telephone calls from customers with helpful answers about their personal computers and our programs.

We are committed to continuing this service, but in order to serve you better, we have recently moved technical support to a new facility with a different telephone number: **318-221-5134**. You may now reach our technical support specialist at this number from 8:00 A.M. to 5:00 P.M. CST, Monday through Friday, for answers to your hardware or software questions. The call is a toll call, but the help is *free!*

If you need assistance in placing an order or renewing a monthly software subscription, or if you have a question about an order, you may use our toll-free number: **1-800-831-2694**.
